

Application Description:

MarketView Mobile™ Provides real time streaming prices from various Indian and leading International exchanges on your JAVA enabled handsets. In addition to this the application provides OTC data, News and other contents real time.

Some of the features include Real-time Market depth, Charts, Alerts, Market statistics, multiple profile creation, Portfolio manager, Mutual funds, Insurance, IPO, Parity Calculator, etc.

The application is most user friendly with an intuitive GUI. The application requires Advanced GPRS connection to enable real-time streaming quotes.

The Modalities

MarketView Mobile™ application for the JAVA enabled handsets can be downloaded from the download link available on MarketView Mobile™ website. On its download you need to contact our support team at support@tickerplantindia.com or call at +91-22-66866060. Our relationship manager will get in touch with you and will explain you about the exchanges covered and also about the costing for exchange feeds and OTC market data. Information about the various payment options would be discussed by RM. Once the payment is credited the User Id and Password will be generated and provided to you. By using this User Id and Password, you can login to the MarketView Mobile™ application and start using it. **Kindly check the list of supported devices on MarketView Mobile™ website.**

Documentation of MarketView Mobile™.

Click on the application Icon  that will appear on the home page of your handset screen and user will be able to see the default Login Screen as shown.

2. Tools Screen:

Tools Screen provides the user to use the special features depending on the privilege. The screen is as shown below,

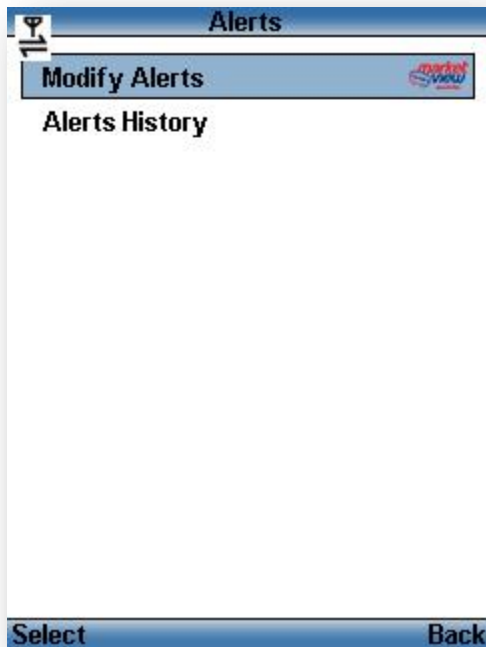

1. User can see the Alerts which he have setted for the records, modify it or remove it.

He can also see the History for the alerts which have generated. Once the alerts have been generated he will have to set it again if he wants to see the alert again.

Alert History will be maintained for that session only and will not be available for next login.

Alerts Screen:

2. Parity Calculator option enables the user who trades in commodity to observe the difference between international and domestic exchanges.

Parity Calculator Screen:

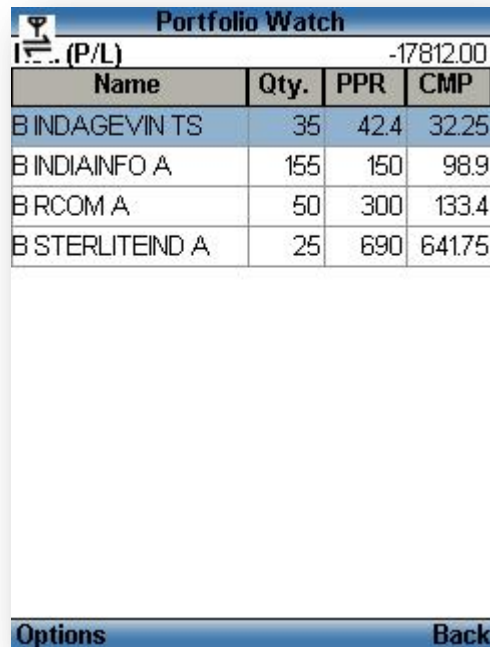

The screenshot shows a mobile application screen titled "Parity Calculator". It features four dropdown menus for data entry:

- Symbol:** Set to "COPPER".
- Base Contract:** Set to "CMX 26MAY2010".
- Future Contract:** Set to "M COPPER 30JUN2010".
- USDINR(Rs.):** Set to "USDINRCOMP".

At the bottom of the screen, there are two buttons: "Select" on the left and "Back" on the right.

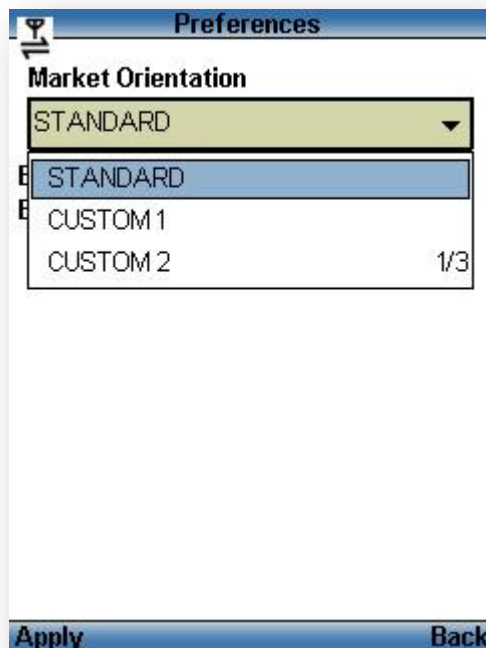

3. The data entered in Profile Screen step 2.g can be seen here with intraday profit/loss. User will be able to modify a given records or remove it permanently.

The screenshot shows the 'Portfolio Watch' screen. At the top, there is a header bar with a menu icon and the title 'Portfolio Watch'. Below the header, a summary row shows '(P/L)' with a value of '-17812.00'. The main content is a table with four columns: 'Name', 'Qty.', 'PPR', and 'CMP'. The table lists four stock holdings: 'B INDAGEVIN TS', 'B INDIAINFO A', 'B RCOM A', and 'B STERLITEIND A'. Below the table, there is a large empty rectangular area. At the bottom, there are two buttons: 'Options' and 'Back'.

Name	Qty.	PPR	CMP
B INDAGEVIN TS	35	42.4	32.25
B INDIAINFO A	155	150	98.9
B RCOM A	50	300	133.4
B STERLITEIND A	25	690	641.75

4. With Preferences user can modify the Market Watch Orientation.

The screenshot shows the 'Preferences' screen. At the top, there is a header bar with a menu icon and the title 'Preferences'. Below the header, the section 'Market Orientation' is displayed. It features a dropdown menu with 'STANDARD' selected. A list of options is shown below the dropdown: 'STANDARD', 'CUSTOM 1', and 'CUSTOM 2'. The 'CUSTOM 2' option has a '1/3' indicator next to it. At the bottom, there are two buttons: 'Apply' and 'Back'.

✓ **About Screen:**

This screen gives the user short information about the product and its proprietary rights.
