

Application Description:

MarketView Mobile™ Provides real time streaming prices from various Indian and leading International exchanges on your iPhone. In addition to this the application provides OTC data, News and other contents real time.

Some of the features include Real-time Market depth, Charts, Alerts, Market statistics, multiple profile creation, Portfolio manager, Mutual funds, Insurance, IPO etc.

The application is most user friendly with an intuitive GUI. The application requires Advanced GPRS connection to enable real-time streaming quotes.

The Modalities

MarketView Mobile™ application for the iPhone can be downloaded from App Store. On its download you need to contact our support team at support@tickerplantindia.com or call at +91-22-66866060. Our relationship manager will get in touch with you and will explain you about the exchanges covered and also about the costing for exchange feeds and OTC market data. Information about the various payment options would be discussed by RM. Once the payment is credited the User Id and Password will be generated and provided to you. By using this User Id and Password, you can login to the MarketView Mobile™ application and start using it.

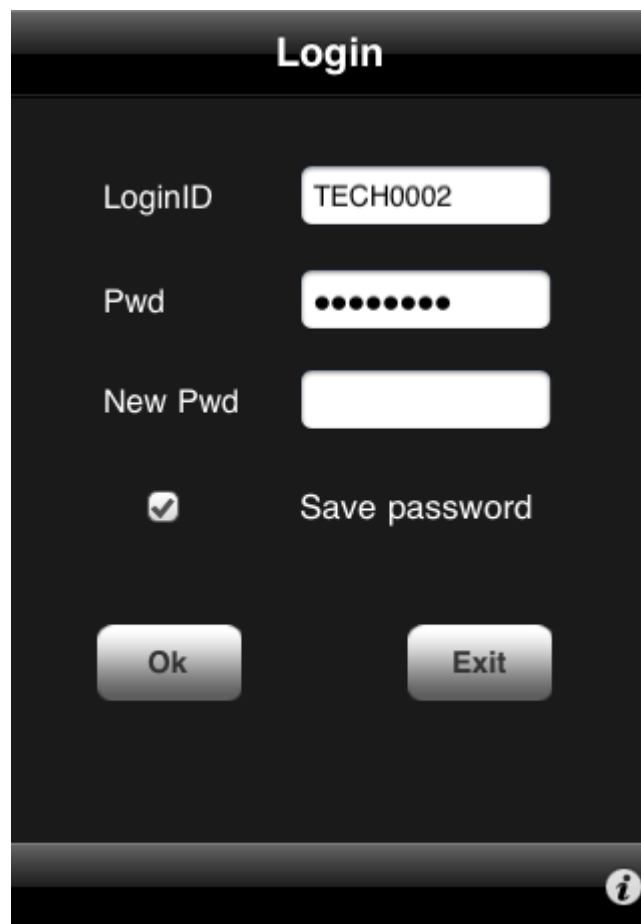

Documentation of MarketView Mobile™.

Click on the application Icon that will appear on the home page of your iPhone screen and user will be able to see the default Login Screen as shown.

✓ Login Screen:

The login screen of the MarketView Mobile application. It has a black background with white text and input fields. At the top, the word 'Login' is centered. Below it, there are three input fields: 'LoginID' with the value 'TECH0002', 'Pwd' with masked characters, and 'New Pwd' which is empty. Below the 'Pwd' field is a checkbox labeled 'Save password' which is checked. At the bottom, there are two buttons: 'Ok' and 'Exit'. In the bottom right corner, there is an information icon (a lowercase 'i' inside a circle).

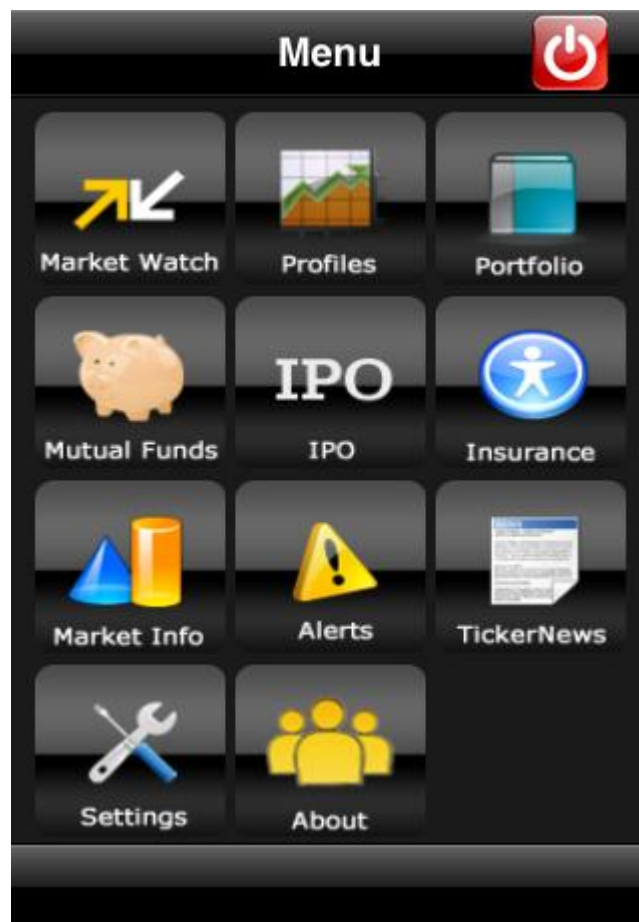

1. The info button on the bottom right corner will navigate you to the website of the company, giving details of the products.
